Preparation of Base and Subbase for the Retaining Wall

Safety – Fast Fence

Widening of the Loading Area to Accommodate Trucks Turning Radius

Scope: Design, Specification/Tender, Contract Administration, Quality Observations

Services Provided: The loading area has issues with the trucks turning radius. The area was designed for new retaining wall to accommodate extra space for trucks turning. Maintain the slope and allow subdrain to address any frost heaving concerns.

Construction Value: \$331,000.00
