To Accommodate 100mm Asphalt Around Light Duty Area

Concrete Island Removed to Accommodate Trucks Turning Radius

New Asphalt Pavement

Scope: Design, Specification/Tender, Contract Administration, Quality Observations

Services Provided: The asphalt pavement parking lot was in poor condition. The roadway from the loading area had issues with the trucks driving on the curbs. The curbs were removed with full depth base repairs and line painted. Significant amount of subdrains were installed and core it into the existing catch basins to reduce the water travelling under the asphalt pavement area.

Construction Value: \$356,000.00
